Current Areas of Support

Engineering Foundation

Food & Chemical Technology

Industrial & Mechanical Technology

Rural Engineering Technician

Electrical & Energy Engineering

Mechanical Engineering

Rural Engineering

Electrical & Energy Technician

Mentor Sessions

Akaraka believes that pure academics are just not enough. These young students who often hail from tiny villages, require guidance on the requirements of a working world. Their academics and technical studies equip them with an education and a chance for employability.

However, of equal importance, is the need for a guide, an advisor, a mentor who can take them through the maze of personality development, social communication and media, work ethics and many other elements that are crucial to the workplace.

Students with their mentors during a progress report writing session

Akaraka Phnom Penh mentors Teck Meng & Kim Hak – the backbone of the mentorship programme

Call out for volunteers & mentors...

We NEED YOU in Phnom Penh!

- ▶ Visiting mentor (one-off sessions with the students)
- ▶ Short-term (workshop sessions)
- ▶ Long-term (regular sessions at specified intervals)

This association is open to individuals and corporates.

Be a Volunteer – Mentor and change lives!
